

AMENDMENTS TO THE SPECIFICATION

Please replace the first full paragraph of page 3 with the following:

In a more concrete case, when the image display is inhibited during the play back of the moving picture, because the audio play is continued, the ~~diver~~driver or the like can confirm that the DVD reproducing apparatus is on play back operation, by listening the sound from the speaker, ~~however~~However, when the still image play back, which ~~is~~was previously edited by the DVD producer, is conducted during the inhibited period of the image display, the audio play back is also stopped.

Please replace the second full paragraph of page 24 with the following:

Next, in step 210, it is judged whether or not “stop command data” is detected, ~~or not~~. Herein, when the “~~top~~stop command data” is detected, the sequence moves to the processing of steps S212 to S218. Further, when the “stop command data” is not detected, the sequence moves to step S220.

Please replace the second full paragraph of page 26 with the following:

Further, when the DVD in which the “~~still~~still control data” or the “~~top~~stop command data” ~~that was~~is previously recorded, is played back, even when the travel is regulated, because the OSD operation button display corresponding to those control data is conducted, the facilities can be increased for the driver or the like.
